Initiative

The International Forum on Urbanism, IFoU (www.ifou.org) is a net work of universities, research institutes and knowledge centres across Asia, Europe and South America, with the task of strengthening international collaboration of research and practice in the field of urbanism.

Focusing on the fast-changing built environment and emerging urban challenges, the IFoU Young Ambassador Initiative is a new platform that aims to promote exchange and collaboration among early-career academics and practitioners of urbanism as well as st-dents of related fields within and beyond IFoU network.

Since 2021, the webinar series is one of the IFoU Young Ambassadors' attempts to start various dialogues among IFoU distinguished fellows and young researchers and practitioners, discussing and debating on different problems confronting our cities today.
